

**Parker Jewish Institute**  
HEALTH CARE AND REHABILITATION

## **COVID-19 Updates from Parker Jewish Institute**

**Tuesday, March 10, 2020**

At Parker Jewish Institute Health Care and Rehabilitation, we value the trust and confidence you have placed with us in caring for your loved ones. In light of the recent concerns regarding COVID-19 and flu, we have taken the following precautions to help ensure the health and safety of our Parker community.

- We are actively screening visitors to the facility and strongly urge anyone who feels ill to stay home.
- Anyone who has become ill after recent international travel, or who is in close contact with someone who became ill after international travel, is strongly urged to stay home.
- Anyone who has been in close contact with someone who has been exposed to COVID-19, is strongly urged to contact their health care provider and self-quarantine, for at least 14 days from exposure.
- We will not allow visitors who are under the age of 18, with exceptions on a case-by-case basis.
- We require all visitors to use hand sanitizer upon entering the facility.
- Visiting hours are now restricted from 11 a.m. to 7 p.m., seven-days-a-week until further notice.
- Patients are limited to their specific floor, to avoid potential exposure that could compromise their health, to help protect them against COVID-19 and the flu.
- Parker Jewish Institute's leadership meets, at least daily, sometimes more, for frequent updates and to monitor the virus on a local, state, national and global level, establishing new measures as needed.
- All restrictions are subject to change based on health advisories, and are dependent on regulatory directives.

We thank you for your continued support and understanding of these new protocols during this time of heightened concern. We will keep you updated accordingly.

Please check the Parker website for daily updates.

Thank you,  
The Parker Community
