

Parker Jewish Institute
HEALTH CARE AND REHABILITATION

Wednesday, March 18, 2020

Dear Parker on Madison Families,

Parker Jewish Institute for Health Care and Rehabilitation recognizes the responsibility that we have had for over 100 years, delivering superior health care and services to the most vulnerable. We are grateful for the trust and confidence that our families have placed in us to care for their loved one.

In regards to our Parker on Madison Social Adult Day Program, the New York State Department of Health, has requested that all senior social programs be suspended. We want to assure you that the request was not as a result of any suspected or confirmed cases of illness at Parker on Madison. No employee or program participant has reported being ill. Nonetheless, in an abundance of caution and in the interests of all, we are following the State mandate and taking all precautionary measures by suspending our programs through March 31, 2020.

We are committed to actively monitoring the situation, following recommendations from the CDC, and taking the necessary precautions to assure the upmost safety for our families, staff and community. As always, we are focusing on what we can do productively during this time, and in addition to ensuring that our facility is thoroughly cleaned and ready for when the program resumes.

Our team is available for you to contact with any questions and concerns, or if you just need to talk. Please feel free to reach out to the POM team at 516-586-1623.

Thank you in advance for your cooperation. Additional updates will be provided to you. And, most importantly, stay healthy.

Thank you,

The Parker Community
