

Parker Jewish Institute
HEALTH CARE AND REHABILITATION

Monday, October 19, 2020

Dear Parker Family Members and Friends,

As you know, the positive test of an employee last week pushed our In-Person Visit target date back; this requires that we must perform additional surveillance testing on our residents, prior to being allowed to begin visitation.

With that said – we have had minimal staff infection incidents, however, within the past 24 hours, we have identified a resident that has tested positive. This resident had not previously tested positive and at this time they are exhibiting a runny nose. No other residents have tested positive and this resident is currently in our Covid-19 monitoring unit, as well as being re-tested.

On a more positive note, we will have a communication to you this week outlining a family visit program that we will implement in the interim. This program will prove to be a wonderful way for our community to keep connected with their loved ones – while maintaining social distance and safety for all.

Thank you for giving us that privilege and trust – we are confident that we will all get through this together because of your support.

Our promise to you is full transparency and to ensure that we will continue to take care of your loved one and provide you with what you need to know that are safe. We are committed to ensuring the health and safety of our community. Under the strong guidance in coordination with our Chief Medical Officer, we are taking all precautions and being prudent in our process and policy.

The Family Call Center remains at your service, to provide you with support and as communication link to our team. Please call 718-289-2888.

Subject due to change as per regulatory guidelines, and Parker Policy

We appreciate your patience during these uncertain times, as our priority remains protecting the health and safety of the Parker community.

Sincerely yours,

Michael N. Rosenblut
President & Chief Executive Officer
