

Parker Jewish Institute
HEALTH CARE AND REHABILITATION

Monday, October 18, 2021

Dear Parker Family Members and Friends,

Parker is proud to announce that we have added twelve new educational resource videos to our YouTube page!

At Parker, we realize that many of our patients and family caregivers may need assistance with the skilled nursing facility discharge instruction. For patients and their families, we developed a video series, to re-enforce prior teaching at Parker, that emphasizes chronic disease self-management and medication management, for complex concerns.

We want our patients and family caregivers to feel prepared and confident, to manage their care at home. The video series provides patients and their families with easy-to-understand medical information, that you can access on ParkerVision (Channel 61), as well as Parker's [YouTube Channel](#) and on [our website](#) from any computer, tablet or smart phone.

Each video takes about 15 minutes to watch and provides valuable information about managing a chronic condition and how to additional information.

As always, thank you for choosing Parker!

Respectfully,

Parker Jewish Institute
